Inlays, Onlays And Crowns

Inlays, Onlays and Crowns

Inlays and Onlays are some of Dr. Davis's favorite choices to conservatively replace silver and composite fillings that are no longer functioning as well as they should. These partial crowns are made from porcelain, composite or gold. The teeth-colored partial crowns are virtually undetectable in the mouth, and conserve much of your natural teeth.

Crown restorations completely cover a tooth to correct severe decay or misalignment, or protect a tooth that has undergone root canal therapy. Existing crowns showing signs of wear may also require replacing.

For more information on inlays, onlays and crowns, please [watch this video](#). Note that Windows Media Player is required.
